EXPERIENCE

Senior Software Engineer

Alpaca

Jul. 2026 - Present | Remote

Founder / All in one

Ploryn AgroTech

Sep. 2024 - Present | Zębowice, Poland

Farm management platform – *Go, React*

- Building a free farm management web app (PWA) from scratch: fields with maps, treatment logs, harvests, warehouse, soil tests and compliance reports
- Integrating public agricultural data: ARiMR eWniosek import, IMGW weather, GUGiK orthophotos, MATIF prices and the MRiRW plant protection register
- Running a grain purchase price tracker across Polish buyers with price alerts
- Adding an AI advisor over farm data and an MCP server for AI assistants
- Platform used by 250+ farms registered only in the first 3 months

---

Farmer

Family farming

Jun. 2010 - Present | Zębowice, Poland

Crop production – *integrated production*

- Starting Integrated Production in crops
- Using modern technologies in farming
- Operating agricultural machinery

Senior Backend Engineer

rift

Mar. 2023 - Sep. 2024 | Remote

Scheduling – *Go, React*

- Providing platform core - scheduling algorithm
- Working as full-stack: frontend, backend and ops

Platform – *Go, React*

- Providing limits-friendly integrations with Hubspot/Salesforce/Zapier
- Provide app deployment in GKE cluster
- Setup Caddy as custom loadbalancer with automatic SSL

Senior Backend Engineer

Smallpdf

Feb. 2022 - Mar. 2023 | Remote

eSign tool – *Go*

- Introducing Golang best practices

SUMMARY

Favourite languages: Golang, C, Prolog, Python (in descending order).
Daily using VS Code + Windows (WSL2), previously Ubuntu user (14.04-20.04).
Love to have consistency across stacks and up-to-date systems.
Enjoy working on both backend and frontend.
Interested in distributed systems and performance optimization.
Passionate about farming and modern agriculture technologies.
Since 2024 building Ploryn, a free farm management platform used by hundreds of Polish farms.

EDUCATION

Agricultural qualifications

Centrum Kształcenia Rolniczego w Mokrzeszowie

2019 - 2020

Bachelor of Engineering in Computer Science

Wrocław University of Science and Technology

2014 - 2018

- Thesis: Position Based Messenger

LANGUAGES

English: intermediate
Polish: native

- Providing eventsourcing based service
- Introducing DataDog tracing and service monitoring

Software Developer

IQVIA

Jun. 2021 - Jul. 2021 | Remote

NDA – *Go*

- Fixing golang repositories
- Adding coding standards with golangci-lint in gitlab pipelines
- Working on elasticsearch based service
- Doing security upgrades
- Introducing application monitoring

Software Developer

Nomtek

Oct. 2019 - Jun. 2021 | Remote/Wrocław, Poland

NDA – *Go, Java, Python, Bash, Chef, Terraform*

- Develop Golang: REST APIs, data processors, job scripts, mobile push service
- Develop Java: data importer, REST APIs
- Develop Python: data logs analyzer/processor based on Datadog API
- Using AWS services: Lambda, EC2 boxes, Fargate, Batch, SNS, SQS, S3
- Integrating login with Apple in Golang service
- Maintain Scylla cluster
- Improve monitoring (tracing, logging, metrics, alerts)
- Maintain stack with Chef and infrastructure with Terraform
- Improve database indexes and queries with performance upgrades of 4x
- Provide on-call service
- Work in multi-timezone/multicultural environment

Software Developer

Opera Software AS

Jun. 2018 - Oct. 2019 | Remote/Wrocław, Poland

VPN – *Go, Python*

- Develop Golang: security and performance patches to VPN, caching library
- Develop Python: deployment tools
- Investigating security/performance/networking incidents
- Doing system and cluster upgrades with service 0-downtime
- Data analyzing and improving Linux system/network performance
- Maintain Docker swarm cluster

Monitoring and alerting system – *Bash*

- Bootstrap Prometheus based alert system for company services
- Providing CI/CD gitlab integration for deployment in multiple environments
- Integrating monitoring with company services
- Tutoring other employees on alert creations

Software Developer Intern in Cloud Computing

Intel Corporation

Jul. 2017 - Sep. 2017 Gdańsk, Poland

Dmidecode plugin – *Go*

- Develop Golang: dmidecode plugin based on dmidecode tool

Snap metric catalog – *Python*

- Develop Python: Github repos parser and data processor
- Leading a 3-person project

Snap Telemetry – *Python*, *Go*, *Bash*

- Develop Golang: integration and unit tests, patching bugs
- Testing plugins on various Linux distributions

PROJECTS

Ploryn – *Go*, *React*
Free farm management platform for Polish farmers. Fields with maps, treatment logs, harvests, warehouse, reports, grain purchase prices and an AI advisor, with an MCP server for AI assistants.

Telegram organization sync – *Go*
Go daemon built on TDLib that keeps Telegram channel membership in sync with an organization server. Ships an OpenAPI contract and a dev server with admin UI.

GoRetro – *Go*, *React*
Agile sprint retrospective tool with multi-phase flow, real-time collaboration over WebSockets and optional AI auto-merge of similar tickets and action proposals. Designed to run behind an OAuth2 proxy.

GoPress – *Go*, *TypeScript*
Lightweight CMS written in Go with an admin panel, markdown editor with preview, RSS feed and article view analytics.

AI MMA – *Astro*, *Go*
Service with ML predictions for MMA fights. Co-created with Data Scientists

SmallPAF (Planning Async Format) – *React*, *Go*
Tool for async ticket estimations

Hearing app – *React*
Simple tool that helps verify frequency range of hearing

Go code generators – *Go*
enumgen adds String, JSON marshalling and validation methods to Go constant types. ddwrap wraps interfaces with Datadog tracing spans.

Chess.com updater – *HTML*, *jQuery*
Simple service with users live stats for OBS usage

Wagapp – *React*, *Go*
Web app for car weight. Simple CRUD, integrated with przelewy24.pl and Auth0

Temperature monitoring system – *C*
Wireless temperature monitoring with Raspberry Pi and ESP8266+BME280. Prometheus with Pushgateway as main services

Simple imperative language compilers – *C*, *Flex*, *Bison*
University project of compiler that generates machine code. First created was 4th in terms of performance on the yearbook. Wrote already 4 of them based on different specifications

Bitlyke – *Go*
Bit.ly like URL shortener. Simple REST API with basic analytics.

SlackUp – *Go*
Slack report generator. Generates daily reports with random work and progress.

Discord bot – *Python*
Python bot for spamming random google search images when using keywords.

JH – *Go*
JQ like CLI tool for HTML except JSON. Crafted for personal usage.

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the Personal Data Protection Act as of 29 August 1997, consolidated text: Journal of Laws 2016, item 922 as amended.
